Here's how Factset executed its Sponsored Editorial + Banner ad campaign.....It displays like this in the newsletter face

The screenshot shows the newsletter layout with several articles and advertisements. Annotations with blue lines point from the text box to specific elements:

- One line points to the "KAPLAN" banner ad for CFA exam preparation.
- Another line points to the "Market Forecast 2011" featured event.
- A third line points to the Factset banner ad.

James Bullard's Five Easy Pieces of Quantitative Easing

The Fed has drawn intense criticism for its decision to purchase \$800 billion in long-term Treasuries over the next eight months. Speaking at NYSSA, James Bullard, the president and chief executive officer at the Federal Reserve Bank of St. Louis, explained the rationale behind the Fed's decision.

More Reasons You Can Be Optimistic About Your Compensation

The eFinancialCareers global bonus survey found half of Wall Street's professionals expect their bonuses to grow this year. No surprise that a third of them credit their own performance for the uptick.

What's Your Risk? Single Name Security Exposure Analysis

Single Name Security Exposures lets you look across all portfolios or a subset of portfolios to quantify your exposure to a security, an issuer, an industry, a country, or a specific set of securities. Simply put, it tells you how much you own and where you own it.

The Economic Reincarnation of India

For those who grew up with images of India as a land of poverty, recent news would seem veritable proof of economic reincarnation. Indian poverty still exists, of course, and in a land of more than one billion people, a 25% poverty rate means that at least 250 million people live in highly precarious conditions. It will be a long time before its poverty can be eradicated, but India can boast of many recent achievements, and there are good reasons to expect that the country will continue to grow and develop rapidly as it has over the last decade.
